Art Unit: 2624

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Imiya et al "Inverse Quantization of Digital Binary Images for Resolution Conversion".

As for claim 1, Imiya teaches a method for converting binary image data at a first resolution to binary image data at a second resolution (page 426, abstract), the method comprising: detecting a plurality of edges of the binary image data (page 426, abstract, lines 6-7); sampling a corresponding point substantially near each of the edges (page 426, Introduction, lines 13-18); fitting a curve between the sampled points (page 426, Introduction, lines 18-19); and re-sampling the curve at the second resolution (page 431, Conclusion, lines 7-8).

As to claim 2, Imiya teaches that the first resolution is less than the second resolution (page 431, Conclusion, lines 7-8).

As to claim 3, Imiya teaches that the first resolution is greater than the second resolution (page 431, Conclusion, lines 7-8).

As to claim 4, Imiya teaches that the first resolution is an integer multiple of the second resolution (page 431, Conclusion, lines 7-8).

As to claim 5, Imiya teaches that the first resolution is a non-integer multiple of the second resolution (page 431, Conclusion, lines 7-8).

Application/Control Number: 10/650,279 Page 3

Art Unit: 2624

2. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Aoyama et al, Loce et al and Lin et al are also cited.

- 4. The IDS filed on 8/27/03 and 4/11/05 have been considered. Reference 2003/007702 has been crossed out since the Publication Number was incorrect. The correct Publication 2003/0007702 (Aoyama et al) has been cited in the PTO-1449.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yon Couso whose telephone number is (571) 272-7448. The examiner can normally be reached on Monday through Friday from 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jingge Wu, can be reached on (571) 272-7429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should
